PROFILE SUMMARY

Passionate and skilled MERN stack developer known for crafting scalable, innovative web applications that solve complex, realworld challenges. Specializes in creating user-centric, problem-solving solutions with a focus on functionality, creativity, and continuous improvement. Eager to contribute technical expertise and drive impactful results within collaborative environments.

TECHNICAL SKILLS

- **Languages**   :   JavaScript, HTML,CSS
- **Technology**   :   Node.js
- **Frameworks**   :   Express.js, Bootstrap, Tailwind CSS
- **Libraries**   :   React.js, Mongoose, Redux
- **Databases**   :   MongoDB, PostgreSQL
- **Tools / Platforms** :   Git, GitHub, AWS, Postman, Figma
- **Integrations**   :   JWT, Socket.IO, Razorpay
- **Architectures**   :   MVC, Repository Pattern

PROJECTS

PICPORT.ONLINE - Social Media Application   ⭘ **Source Code**

PicPort is a social media platform allowing users to create posts, share stories, and connect with others via following and private accounts. Premium subscriptions are seamlessly integrated using Stripe for secure payments

- **Formik** and Tailwind CSS ensure robust frontend validation and elegant styling, respectively. **JWT** (JSON Web Token) authentication and role-based authorization offer secure access control. **Redux-persist** ensures persistent user data, while **Axios** and **CORS** facilitate smooth frontend-backend connectivity
- Utilized the MERN stack (**MongoDB, Express.js, React.js, Node.js**) robust back-end development, implementing a Repository Architecture for scalable and modular code.
- Incorporated **Google authentication** and push notifications with **Firebase**, ensuring secure user access and   timely updates.
- **STACK USED**: React.js, Tailwind, Node.js, Express.js, MongoDB and Git

WORLD OF SHOES E-Commerce Web Application   ⭘ **Source Code**

- Developed a full-stack e-commerce platform with advanced features. User authentication is ensured using **bcrypt** for password hashing and OTP via **Node mailer** for additional security. Integrated **Razorpay** payment gateway offering wallet and referral incentives
- Implemented an efficient order management system. Dynamic product sales visualization is achieved through Graph.js.
- Admin functionalities include **CRUD** operations for users, products, categories, coupons, offers, and banners. Seamless add, delete, block, and edit functionalities are provided for optimal user experience
- **STACK USED : -** Node.js,Express.js, EJS, JavaScript, MongoDB, git and NGINX.

MINI PROJECT

NETFLIX CLONE
Brotype

🎧 **[Source Code](#)**

Developed a Netflix clone using **React.js**, closely mimicking the Netflix interface for a dynamic viewing experience.
• Integrated **TMDB** (The Movie Database) API to fetch and display movie data, providing users with up-to-date information.
• Implemented dynamic content loading and user-friendly navigation to enhance user engagement and experience.

USER MANAGEMENT SYSYTEM
Brotype

🎧 **[Source Code](#)**

• Developed a User Management System using **Node.js** and **Express.js**, focusing on efficient user data handling.
• Implemented session-based authentication to securely manage user logins and sessions.
• Designed and implemented **RESTful APIs** for user operations, ensuring scalability and maintainability.

EDUCATION

FULL STACK DEVELOPMENT   Kochi, Ernakulam
BROTOTYPE   Aug 2023 - Present
• specialized in Mern Stack

BACHELORS OF COMMERCE
ANNAMALAI UNIVERSITY   Mar-2018-Mar 2021
